2.2

Executive Summary

Security Assessment Overview

This automated security assessment analyzed the publicly accessible components of the target website and identified common security weaknesses based on industry best practices.

The assessment detected **6 security findings**.

The overall security rating is: **Good**

Target Information

Target URL	[REDACTED]
HTTP Status	200
Assessment Date	[REDACTED]
Scanner Version	2.2
Report ID	[REDACTED]

Methodology

The security assessment was performed using automated analysis techniques against publicly accessible website components.

The scanner checks for common web security weaknesses, configuration problems and publicly exposed information.

The assessment follows general security best practices inspired by industry standards such as OWASP recommendations.

Assessment Scope

Security Check	Description
Security Headers	Checks HTTP security headers including HSTS, CSP and browser protection headers.
SSL/TLS Configuration	Analyzes HTTPS certificate validity and encryption configuration.
Sensitive File Exposure	Searches for publicly accessible configuration and backup files.
Cookie Security	Checks cookie protection attributes such as HttpOnly and Secure.
CORS Configuration	Analyzes cross-origin access control settings.
CMS Detection	Detects commonly used content management systems.
API Exposure	Checks publicly accessible API documentation and endpoints.
Directory Listing	Detects publicly exposed directories.
Robots and Sitemap Analysis	Reviews publicly accessible paths and potential sensitive locations.
HTTP Security	Checks HTTPS enforcement and mixed content issues.
DNS Security	Checks SPF and DMARC email security configuration.
Security.txt	Checks vulnerability disclosure contact availability.

Risk Rating Explanation

Severity	Meaning
Critical	Immediate security risk requiring urgent action.
High	Serious vulnerability that could lead to compromise.
Medium	Security weakness that should be addressed.
Low	Minor issue or recommended improvement.
Info	Informational finding without direct security impact.

Security Score

OVERALL SECURITY SCORE

80/100

RISK LEVEL
Good

Finding Overview

0 CRITICAL	0 HIGH	4 MEDIUM	2 LOW
